Model: Multisample Structural Equation Model with Ordered Categorical Variables, M1
Data Set Names: YO1.dat, YO2.dat, XI1.dat, and XI2.dat, where XI1.dat and XI2.dat are initial values for xi in the groups 1 and 2, respectively.
Sample Sizes: N1=338 and N2=247
Constraint: No constraints

There are two groups: group 1 and group 2. We choose group 1 as the reference group.
